

Olympus Appointment and News Templates - Draft R6

Blank appointment, deputy, affiliation, audit and revocation instruments, plus the reusable daily news template.

Unratified draft. No appointments issued and no permissions changed.

This is an excerpt from the preserved 40-page successor draft R6. Original page numbers are retained so a reader can cross-check the complete book. Blank signatures stay blank.

The authoring date is not an adoption or effective date. Proposed rules and historical source snapshots do not prove current software behavior. Technical release evidence and separately authorized appointments remain independent.

3 Letters Patent and Warrants

DRAFT TEMPLATES - COMPLETE AND APPROVE BEFORE USE

These instruments record community appointments. They do not confer real-world titles or rights and do not self-grant Discord, website, addon, game, bank, or infrastructure permissions. Each system's authorized operator must separately apply and verify the minimum approved access. Blank fields, chart labels, and a candidate's consent alone do not create authority.

3 1 Common execution and register

Use a unique instrument number and record the approving authority, relevant Charter provision, exact scope, start, expiry or review date, and superseded instrument. An unspecified power is reserved, not delegated. Identify the appointee by their verified account reference and, where needed, verified character and guild; do not publish unnecessary private identifiers. File the signed instrument in the appropriate register and publish a member-readable summary. Sensitive access details belong in a restricted annex.

Common record: Instrument number _____; version _____; appointee or guild _____; issuing authority _____; adoption date _____; effective date _____; expiry or review date _____; authority provision _____; supersedes _____.

Acceptance: "I accept the stated duties and limits, will disclose conflicts, protect entrusted records, and relinquish delegated authority when this instrument ends." Appointee signature _____; date _____. Issuing signature _____; witness or registrar _____; publication reference _____.

3 2 Appointment patent

"Under the ratified Charter, we appoint _____ to the office or duty of _____, serving _____. The holder reports to _____ and coordinates with _____. The appointment authorizes only the decisions and actions listed below. It does not imply a higher native rank or authority over other guilds."

Complete the following operative schedule:

- Duties and expected service: _____.
- Decisions permitted without further approval: _____.
- Decisions requiring approval and approver: _____.
- Financial ceiling, if any, and prohibited transactions: _____.
- Records accessible, purpose, and confidentiality: _____.
- Proposed minimum system access, separately approved: _____.
- Deputy, absence arrangement, and reporting frequency: _____.
- Conflicts, recusal substitute, and review criteria: _____.

The issuing authority may revoke within its constitutional competence by a recorded decision. A disciplinary removal follows the applicable review process; resignation or ordinary expiry requires no allegation of misconduct. Handover must preserve records and identify outstanding work. Access removal is separately tracked until verified.

3 3 Deputy or acting warrant

"We designate _____ as deputy to _____ for _____. This warrant operates only during the conditions recorded below. The deputy may exercise the expressly delegated powers and must refer all reserved matters to _____."

Activation condition or acting period: _____. Delegated powers: _____. Exclusions and financial limit: _____. Notice required on activation: _____. Reporting and return of authority: _____. End condition: _____.

The deputy may not rewrite the principal's appointment, appoint their own successor, enlarge access, or bind Olympus beyond the stated period. An acting warrant expires at its stated end or on lawful return of the principal. Permanent appointment requires a separate patent.

3 4 Guild affiliation and Guild Master patent

"We recognize _____, designated Olympus _____, as an affiliated guild under the common Charter, and confirm _____ as its Guild Master for the stated term. The Guild Master governs the individual guild and answers to the Founder and High Council for the common obligations. Departmental coordination shall occur through appointed emissaries, without converting ministers into local commanders."

Verified guild and realm: _____. Local officers and succession process: _____. Common obligations accepted: _____. Local practices requiring publication: _____. Treasury arrangements and responsible custodians: _____. Named emissaries or vacancies: _____. Review date and affiliation withdrawal process: _____.

Affiliation does not merge ownership of private accounts, transfer every local asset, or automatically grant Council access. The directory is updated only after confirmation. Ending affiliation requires a recorded decision, member communication, and an orderly account of shared obligations; it does not authorize destruction of local records or unrelated role assignments.

3 5 Independent auditor warrant

"We appoint _____ to examine the records of _____ for the period _____ and report to _____. The auditor is independent of the withdrawals and approvals under examination and has no withdrawal, transfer, repair-spending, or transaction-approval authority over those assets."

Audit questions and scope: _____. Read-only records authorized: _____. Custodian providing access: _____. Conflicts and alternate auditor: _____. Report due date: _____. Restricted findings recipient: _____. Member-readable summary: _____. Access expiry and removal check: _____.

The auditor may request explanations and supporting records, compare receipts with ledger and available bank logs, and recommend corrections. They may not alter evidence, recover assets by private seizure, announce an allegation as a finding, or impose sanctions. Unresolved discrepancies are referred through the published financial and justice procedures. A completed audit states its limitations, including missing logs or incomplete records, rather than certifying what was not examined.

3 6 Revocation and acknowledgement record

Instrument revoked, resigned, expired, or superseded: _____. Authority and reason category: _____. Effective moment: _____. Replacement or acting cover: _____. Handover recipient: _____. Pending work and preserved records: _____. Individual system access changes approved and verified by: _____. Notice and review route: _____.

Holder acknowledgement, if obtainable: _____. Issuing authority signature: _____. Registrar confirmation and date: _____. Lack of acknowledgement does not preserve an expired delegation; it must not be falsely recorded as consent or an admission.

Daily News Template

Issue identity

Olympus Daily issue number: _____ Date: _____ Time zone: _____

Editor: _____ Operational approver: _____ Audience and destination: _____

Lead announcement

Headline and one paragraph stating what changed, who it affects, effective date, member action and the named confirming source. Mark a proposal as a proposal. If no announcement is verified, state that clearly.

Events and readiness

Event name; guild or cross-guild scope; start time and time zone; organizer; sign-up route; capacity; requirements; loot or reward rule; recording/streaming notice; cancellation contact. Every event owner checks their entry before publication.

Community and treasury

Confirmed achievements or voluntary recognition; recruitment capacity supplied by the relevant Guild Master; approved crafting or supply requests; suitable treasury summary without names of debtors or confidential receipts. Record the source privately and ask permission for identifiable images or quotations.

Governance notices

Adopted instrument reference and effective date; recorded appointment or vacancy; member consultation and deadline; neutral explanation of any process change. Publish no private Justice evidence, privacy receipt, personal contact details or secret recovery information.

Corrections and next issue

Correction to issue: _____ Original claim: _____ Correct wording: _____

Verified by: _____ Follow-up owner: _____ Next issue date if scheduled: _____

Final check: current facts, audience, consent, time zones, working links, no credentials, no unnecessary private records, approval recorded. Publication is performed by an authorized human or a separately approved integration.
